Continuation of 11. does NOT place the application in condition for allowance because: The Applicant has argued that the satilite modules, as disclosed by the modified Stokes et al., does not selectively distributing or receive signals. However, the examiner again restates that it has been held that the recitation that an element is "adapted to" perform a function in not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138. Therefore, the request for reconsideration is deemed unpersuasive.
